## Professional Objective

Detail-oriented Computer Applications graduate and Data Science enthusiast with a solid foundation in programming, database architecture, and statistical analysis. Proficient in Python, SQL/PL-SQL, and Machine Learning concepts, with hands-on experience building predictive models and end-to-end data pipelines. Seeking an entry-level Data Scientist or Data Analyst role to translate complex datasets into actionable business insights.

## Academic Performance

| Qualification                             | Institution / University       | Year        | Grade / CGPA  |
|-------------------------------------------|--------------------------------|-------------|---------------|
| Bachelor of Computer Applications (BCA)   | M J COLLEGE OF COMMERCE(MK BU) | 2023 – 2026 | 7.8 / 10 CGPA |
| Higher Secondary Certificate (HSC – 12th) | DEVKA VIDHYAPEETH              | 2023        | 58%           |
| Secondary School Certificate (SSC – 10th) | DEVKA VIDHYAPEETH              | 2021        | 63%           |

## Technical Skills

- **Languages:** Python, SQL, PL/SQL, Java, C++
- **Data Science & Machine Learning:** Exploratory Data Analysis (EDA), Regression,

- Classification, Clustering, Scikit-learn, Feature Engineering
- **Libraries & Analytics:** Pandas, NumPy, Matplotlib, Seaborn, SciPy
- **Databases & Warehousing:** MySQL, Microsoft SQL Server, Query Optimization, Stored Procedures, Views
- **Tools & Platforms:** Jupyter Notebook, Google Colab, Git, GitHub, VS Code, Power BI / Tableau (Basics), Excel (Advanced)
- **Core Concepts:** Probability & Statistics, Data Wrangling, Relational Schema Design, Model Evaluation

## Key Projects

---

**E-Commerce Sales Insights & SQL Data Warehouse** | *Tech Stack: SQL Server, PL/SQL, Power BI, Python*

- Designed relational database schemas with complex SQL stored procedures to extract transaction metrics and product trends.
- Conducted cohort retention analysis and revenue tracking, summarizing key findings into dynamic dashboard visualizations.
- Automated ETL data extraction scripts using Python to clean and load raw CSV transaction logs into a structured database.

## Certifications & Achievements

---

- **Certifications: Machine Learning Techniques and their Real-World Applications** | *SK International Journal* (Feb 2026) — [Verify Certificate](#)
  - Researched core ML algorithms, evaluating model accuracy and practical deployment frameworks across real-world industry use cases.
- **Achievements:** Completed Kaggle competitions and data analysis challenges; awarded top score in collegiate programming and algorithmic assessments.

## Interests

---

- Predictive Analytics & Statistical Modeling
- Automated Machine Learning (AutoML) & MLOps
- Data Storytelling & Business Intelligence Dashboards
